

TUNING INSTRUCTIONS 5/8 MOBILE ANTENNA

MODEL SF-2 "BUCK BUSTER"™

The "Buck Buster" Model SF-2 is a 5/8 wave antenna designed to cover the entire 2 meter band from 144 to 148 MHz.

The tip rod is adjustable. Loosening the clutch nut will allow about 2 1/8" movement of the tip rod. This should be enough to allow adjustment for best S.W.R.

Insert Watt Meter in coax line and adjust the tip rod length for best S.W.R.

Should the tip rod need to be shortened, to reach a higher frequency of operation, do so by grinding rod to the new length from bottom end. Be sure to remove all burrs from rod before reinsertion.

1" of rod length equals approximately 3 MHz of frequency change.
