

MiniVax 40/20/15/10 DIPOLE

The MiniVAX, 40, 20, 15 and 10m
Copyright M0CVO Antennas 2020

Four band dipole for 10m, 15m, 20m and 40m. SWR below 2.5 throughout the whole 10, 15, 20 and 40m bands. This is fitted with a M0CVO 1:1 BALUN at the feedpoint and can be fed with standard 50ohm coax. An inline ATU is recommended, especially when using an external amplifier.

Overall length is just 20m so will even fit in small gardens. It is best mounted as an inverted vee, as in the image above, but other options may be suitable in order to fit in the available space.

Specifications:

Length: 20m

Bands: 10m / 15m / 20m / 40m

Max Power: 400W CW, 550W SSB*

*This power rating is for intermittent amateur (CW or SSB) use and not for AM broadcast or constant carrier data modes. For these modes a much higher power BALUN is required.
