INSTRUCTIONS FOR
COBRA MODEL CA-60 "DYNAMIKE PLUS"
BASE STATION AMPLIFIER MICROPHONE

The Cobra CA-60 "DYNAMIKE PLUS" is an amplified microphone, designed
for base station operation with CB radios. It includes a solid state amplifier,
adjustable gain control, push-to-talk switch with lock feature, and a relay/
electronic switch that adapts the CA-60 for use with both relay and electronic
controlled transmitters. A light-emitting diode illuminates when the push-to-talk
switch is operated.

Your DYNAMIKE PLUS is mounted on a handsome free-standing profes-
sional-type black pedestal. The height and angle of tilt of the pedestal are
human-engineered, for comfortable operation of the microphone. The dual
transistor amplifier—in addition to providing more talk power—accentuates the
more desirable and useful frequencies of your voice.

The amplified microphone allows you to communicate effectively whether
you are speaking in a normal voice at a distance from the microphone, or talking
close to it.

INSTALLATION

Your Cobra DYNAMIKE PLUS comes equipped with a four-pin connector
already installed on the cable. When used with any Cobra radio, all you have to
do is plug the CA-60 into your radio. (For instructions on using your
DYNAMIKE PLUS with any radio other than Cobra, see page 3.)

OPERATION (Refer to Fig. 1 and 2)

1. Check transceiver instruction manual to determine whether switching is
electronic or relay.
2. Set switch (5) to proper position to correspond with transceiver switching.

NOTE

Be careful to set the CA-60 gain control to an optimum level for best
intelligibility; excessive gain can result in undesirable distortion.

Amplified microphones should not be operated close to speakers nor
to antennas to avoid possibility of acoustic or RF feedback.

3. Depress the push-to-talk switch (1) [noticing that the TX lamp (3) lights]
and speak in your normal voice. If you want the radio to remain in the
transmit mode without having to hold the push-to-talk switch, depress the
LOCK bar (2).
4. To return to receive mode, depress and release the LOCK bar.
5. If the TX lamp does not light when the push-to-talk switch is depressed,
remove the battery cover screw (4), beneath the base, and replace the
batteries.

USING THE CA-60 WITH RADIOS OTHER THAN COBRA

Alternate Cable Connector

To wire the DYNAMIKE PLUS for radios other than Cobra models, refer to your CB radio instruction manual for proper connector and wiring.

On your CA-60 cable, color code is as follows:

- White wire: Audio lead
- Shield: Ground
- Red wire: Transmitter control
- Black wire: Receiver control

**Fig. 3.** Model CA-60 schematic diagram.

COBRA MODEL CA-60 SPECIFICATIONS

**TYPE:** Dynamic microphone with transistor amplifier and gain control.

**IMPEDANCE:** 900 ohms, ±30% at 1 kHz.

** FREQUENCY RESPONSE:** Voice range.

**OUTPUT LEVEL:** -45 dB ±5.5 dB at 1 kHz, with gain control set at max.

**AMPLIFIER VOLTAGE GAIN:** 24 dB. ±3 dB with gain control set at max.

**COILED CABLE:** 12 inches to 6 feet.

**WEIGHT:** 20 oz.

**BATTERY:** 2 type AA (not supplied).

**NOTE:** Standard value resistors and capacitors are not listed. Values may be obtained from schematic diagram. Minimum charge $5.00 per invoice. Orders will be shipped C.O.D. unless previous open account arrangements have been made or remittance accompanies order. Remittance must include postage or express charges. Specify serial number to facilitate identification of exact replacement parts.
WARRANTY SERVICE INSTRUCTIONS

1. Refer to instruction manual for adjustments that may be applicable.

2. Defective parts removed from units which are within the warranty period should be sent to the factory prepaid with model and serial number of product from which removed and date of product purchase. These parts will be exchanged at no charge.

3. If the above-mentioned procedures do not correct the difficulty, pack the product securely using the same package arrangement as supplied by the manufacturer. A detailed list of troubles encountered must be enclosed as well as your name and address. Forward prepaid (express preferred) to the nearest Dynascan-authorized Cobra Communications service agency.

Contact your local Dynascan Distributor for the name and location of your nearest Cobra service agency, or write to:

90-DAY LIMITED WARRANTY

"DYNASCAN warrants that each product manufactured by it will be free from defects in materials and workmanship under normal usage and service for a period of ninety days after its purchase new from an authorized COBRA distributor. Our obligation under this warranty is limited to repairing or replacing any product or component which we are satisfied does not conform with the foregoing warranty and which is returned to our factory or our authorized service contractor, transportation prepaid, and we shall not otherwise be liable for any damages, consequential or otherwise. The foregoing warranty is exclusive and in lieu of all other warranties (including any warranty of merchantability), whether expressed or implied. Such warranty shall not apply to any product or component (i) repaired or altered by anyone other than DYNASCAN or its authorized service contractor (except normal tube replacement with DYNASCAN's prior written approval); (ii) tampered with or altered in any way or subjected to misuse, negligence or accident, (iii) which has the serial number altered, defaced or removed; or (iv) which has been improperly connected, installed or adjusted otherwise than in accordance with DYNASCAN's instructions. DYNASCAN reserves the right to discontinue any model at any time or change specifications or design without notice and without incurring any obligation. The warranty shall be void and there shall be no warranty of any product or component if a DYNASCAN warranty registration card is not properly completed and postmarked to the DYNASCAN factory within ten days after the purchase of the product new from an authorized COBRA distributor."
