

ROAD KING 56

The Road-King 56 (RK-56) Dynamic Microphone is designed for voice communications applications requiring a rugged, hand-held microphone. Its noise-canceling design makes it particularly effective for use in noisy locations, and its excellent voice response characteristics make it a good choice in quiet areas as well. The RK-56 uses dynamic, differential type cartridge which discriminates against sounds greater than ½-inch (12 mm) away. A non-marking lip guard assures the user of correct microphone-to-mouth positioning. Best noise cancellation is achieved with the edge of the lip guard just touching the upper lip. The push-to talk switch is located on the top of the microphone housing. The RK-56 is equipped with a six-conductor, black coiled cord which is relieved at the microphone housing by a telephone type strain relief grommet. The coiled cord is 12 inches retracted, 6 feet extended. The cord may be wired for either relay or electronic switching. The RK-56 comes either unterminated or terminated.

MODEL NO.

04329 - unterminated

04329-4P - 4 pin Cobra/Uniden

04329-4PM - 4 pin Midland

04329-5P - 5 pin Cobra/Uniden

ROAD KING 56B

The Road-King 56B (RK-56B) Dynamic Microphone is designed for voice communications applications requiring a rugged, hand-held microphone. Its noise-canceling design makes it particularly effective for use in noisy locations, and its excellent voice response characteristics make it a good choice in quiet areas as well. The RK-56 uses dynamic, differential type cartridge which discriminates against sounds greater than ½-inch (12 mm) away. A non-marking lip guard assures the user of correct microphone-to-mouth positioning. Best noise cancellation is achieved with the edge of the lip guard just touching the upper lip. The push-to talk switch is located on the top of the microphone housing. The RK-56B is equipped with a six-conductor, black coiled cord with a bend relief at the microphone housing. The cord may be wired for either relay or electronic switching. The coiled cord is 16.5 inches retracted, 7.5 feet extended. The RK-56B comes either unterminated or terminated.
