- ② Tuning indicator (TUNING)
- ③ Tuning control (TUNING)
- ④ Tone selector (TONE)
- ⑤ Volume control (VOLUME)
- ⑥ Volume indicator (VOLUME)
- ⑦ Band selector (BAND)
- ⑧ Band indicators (FM, LW, MW, SW)
- ⑨ Earphone jack (EARPHONE) (Ø 3.5, 3 - 8 Ω)
- ⑩ AC socket (AC IN)

How to use the earphone (not included)

Reduce the volume level. Connect the earphone to the earphone jack (⑨).

- Avoid listening for prolonged periods of time to prevent hearing damage.
- Speaker is automatically cut off when the earphone is connected.

Listening to the Radio

Follow steps 1 - 4.

When tuning into a station, the tuning indicator will illuminate.

To turn off the unit, press OPERATION.

Antennas

FM:

Pull out the telescopic antenna and adjust its length and angle for optimum reception.

LW/MW:

The built-in ferrite core antenna will provide excellent LW/MW reception in most areas. Turn the unit in the direction which gives the best results since the ferrite core antenna is directional.

SW:

Extend the telescopic antenna fully, keep it vertical.

■ Operation Check and Main Component Replacement Procedures

NOTE

1. This section describes procedures for checking the operation of the major printed circuit boards and replacing the main components.
2. For reassembly after operation checks or replacement, reverse the respective procedures. Special reassembly procedures are described only when required.
3. Illustrated screws are equivalent to actual size.
4. Refer the parts No. on the page of "Main Component Replacement Procedures", if necessary.
